- Number of study programmes – **14**

About the Faculty

The mission of the Faculty of Economics and Sociology is to create social processes by generating and disseminating knowledge, which ensures development of students (by providing didactic reliability and creating an attractive space for studying), employees of the faculty (by striving for scientific excellence and providing attractive working conditions) and entities operating in its socio-economic environment (through cooperation and exchange of experience).

The faculty specialises in various research areas in the field of social sciences, with particular emphasis on the study of the economy and its modelling, finance, real estate markets, as well as sociology and spatial management. Many of these studies cover the issues of post-industrial cities transformation, including research on social transformations, development of new knowledge-intensive branches of economy, social and spatial inequalities and their elimination, as well as demographic changes and sustainable development.

CLEARING HOUSE project

Collaborative Learning in Research, Information-Sharing and Governance on How Urban Forests as Nature-based Solutions Support Sino-European Urban Futures. The project is funded by the Horizon 2020. Its objective is to develop solutions that increase the resilience of cities to ecological and socio-economic challenges related to the quality of life, adapted to the needs of European and Chinese cities. Project manager from the University of Lodz: dr hab. Jakub Kronenberg, prof. UL.

IACBE Accreditation

In 2021, our Economics study programme obtained a prestigious American accreditation granted by the leader of accreditation for business education programmes – the International Accreditation Council for Business Education. The accreditation confirms that the University of

Lodz meets the following requirements: efficient functioning, high level of didactics, innovative management, good relations with business and high value of the diploma, which is valuable on the labour market.

Openness to the local socio-economic environment

Openness to the local socio-economic environment is expressed by various significant projects and the faculty employees' participation in university-wide research structures, such as: University of Lodz Interdisciplinary Centre for Urban Studies, University of Lodz Centre of Migration Studies, University of Lodz Centre of Social Innovations, Centre for Data Analysis, Modelling and Computational Sciences (CAMiNO).
